

Sodium Hypochlorite Only (Bleach) UN1791

WARNING: MIXING SODIUM HYPOCHLORITE WITH ANOTHER CHEMICAL MAY CAUSE A DANGEROUS SITUATION

GUIDANCE TO AVOID ACCIDENTAL MIXING

1. Verify that the shipping papers are in order
2. Verify that the tanker is loaded with sodium hypochlorite solution (UN 1791)
3. Verify that the receiving tank has sufficient capacity
4. Verify that the drain sump is empty, rinsed, and isolated prior to unloading
5. Verify that the unloading connections/piping are correct (check labels, routing, etc.)
6. Verify correct connections by a second person
7. Monitor tank level during the unloading process
8. Follow applicable regulations for monitoring/attendance
